aayushict

Brand guide · version 1 · 2 Oct 2026

AAYUSHICT.SPACE

One look for the website, every page, every screen.

Black for reading. Wine for the brand. White where you touch, play or compare. Deep rose for small accents. This guide holds every colour, font, size and rule we decided, so the site can be built without guessing.

Black
The base. Calm, long reading.

Wine
The brand. Buttons and big moments.

White
Contrast. Interactive parts and numbers.

Deep rose
Small accents on black only.

01 COLOURS

The palette

Use the token names from tokens.css in code. The hex values are here so you can match them in Canva or Figma too.

Black side

Page	`#141011 · --page`	Background of every page.
Surface	`#1E1719 · --surface`	Cards and boxes on black.
Line	`#2B2325 · --line`	Borders and dividers.
Raised	`#2A2124 · --surface-raised`	Chart and image frames.

Text on black

Heading	`#F6F1EE`	Titles. Never pure white.
Body	`#E9E3E0`	All reading text.
Soft	`#C9BEC1`	Intro lines, card text.
Muted	`#8C7F82`	Dates, captions, sign off.

Brand

Wine	`#6E1A33 · --wine`	Buttons, wine band, selected toggles, key number on white.
Deep rose	`#B44C6C · --rose`	Logo ict, labels, links, term underline. On black only.
Wine deep	`#5A1429`	Cards inside the wine band.
Rose on wine	`#F7C9D1`	Labels inside the wine band.

White side

White	`#FFFFFF`	Interactive cards, numbers table, bands.
White tint	`#F7F2F3`	Tiles inside white cards.
Ink	`#1A1416`	Headings and numbers on white.
Ink muted	`#5E5457`	Labels on white.

Direction

Red and green already mean down and up in trading, so they never become brand colours. Direction always shows an arrow plus a word.

▲ Up	**Up on black**	`#5FD39A`
▼ Down	**Down on black**	`#FFB27A`
▲ Up	**Up on white**	`#117A45`
▼ Down	**Down on white**	`#9A5B00`

02 WHERE WHITE LIVES

White is for contrast, not everywhere

Reading always happens on black. White appears only where something needs to stand out or be touched.

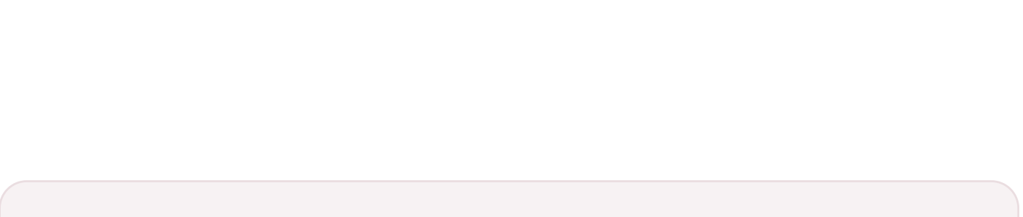
On the home page

Full width bands that switch contrast, like chapters.

Black · hero
White · the gap
Black · one real night, with a white numbers card
Wine · this night was rare
White · what you get here
Black · footer

On reading pages

Black page. White cards for toggles, sliders, quizzes and numbers tables.



TRY IT · SCENARIOS

Pick the result. See what moves.

03 FONTS

Four fonts, four jobs

Each font does one job only. Never swap them around.

HEADINGS

Aptos SemiBold

Every title and heading. Weight 600. Aptos is Microsoft's font, so phones without Office show Figtree instead, which looks very close.

READING

Source Serif 4

All body text. Chosen for calm, long reading. Free from Google Fonts.

INTERFACE

Instrument Sans

Nav, buttons, toggles, captions, meta lines. Nothing longer than a line.

NUMBERS

`-23K · 4.1% · 6:04 PM`

JetBrains Mono. Every number, price, time and section label.

Sizes

Use	Font	Laptop	Phone	Line height
Home hero line	Aptos 600	68	40	1.08
Home section heading	Aptos 600	44	30	1.15
Page title	Aptos 600	54	36	1.1
Section heading	Aptos 600	34	27	1.2
Sub heading	Aptos 600	24	21	1.3
Intro line	Source Serif 4	24	20	1.55
Body text	Source Serif 4	21	18	1.8
Number inside text	JetBrains Mono	17	15	same as text
Nav and buttons	Instrument Sans	15	14	1
Meta and captions	Instrument Sans	14	13	1.5
Section label	JetBrains Mono, capitals, spacing 0.1em	13	12	1

04 THE WORDMARK

aayushict

One word, all lowercase, Aptos Bold. No underscore. The "ict" carries the accent colour.

aayushict
On black: ict in deep rose #B44C6C

aayushict
On white: ict in wine #6E1A33

aayushict
On wine: ict in soft pink #F7C9D1

Spacing changes with size

Tight when big, a little looser when small, so the letters never touch.

`72px and up · -0.035em`	aayushict
`44px · -0.035em`	aayushict
`28px · -0.02em`	aayushict
`20px, site header · 0`	aayushict
`14px and below · +0.015em`	aayushict

ai ai ai

Profile picture and favicon

Just "ai" in Aptos ExtraBold, the i in deep rose, on a black circle with a thin wine ring. Two letters stay clear even at comment size.

Heavy version

aayushict

Aptos ExtraBold. Only for thumbnails and big covers, never in the site header.

Don't add an underscore
aayush_ict was the old name style. The mark is one word now.

Don't put deep rose on wine
It disappears. Use the soft pink on wine.

Don't keep it tight when small
Below 28px, open the spacing using the table above.

05 BUILDING BLOCKS

The pieces every page uses

Buttons, cards and boxes keep the same shape everywhere.

BUTTONS

Start here

Get the briefing

Wine on black. White with wine text on wine. Radius 10. At least 44px tall on phone.

PROOF CHIPS

`102 points`

`Apex payout $1,446 ↗`

Mono text on surface. A wine border means it opens proof.

TERM TIP

A lot was already priced in.

Priced in
What the market already expects.

Layout

Laptop reading width
900px. Text, white cards and charts share the exact same left and right edges.

Phone
22px side padding. Side by side cards stack. Check every page at 375px.

Corners
Buttons 10. Cards 14. White interactive cards 20 on laptop, 18 on phone.

06 VOICE

How the words sound

The look is calm. The words should be too.

- First person. I read, I traded, I don't remember.
- Sentences of about 9 to 13 words.
- Plain Indian English. Explain jargon on first use with a term tip.
- No em dashes, no hyphens joining thoughts. Use full stops or commas.
- Never "hawkish" or "dovish". Say what the Fed is likely to do.
- Real numbers only. If something isn't remembered, say so.
- Show losing trades too. They stay visible.
- Every market post ends with: Not advice. Stop loss on.

MACRO · FUTURES · FROM INDIA

Know what's priced in. Trade what changes.

I read NFP, CPI and the Fed before they print. Then I trade Nasdaq futures from India, on funded accounts.

`102 points` `4 MNQ` `Apex payout $1,446 ↗`

THE MACRO SIDE

What the market already expects

And what would change it. Three scenarios, written before each release.

THE FUTURES SIDE

Trading NQ from India

Through prop firms, with ICT execution on real trades.

THE GAP

Most people learn one side.

The chart traders skip the news. The news readers can't find an entry. The money is where they meet.

Chart only

Sees the move. Misses the reason behind it.

News only

Knows the number. Has no plan for the entry.

Trading from India

Late nights, prop rules, payouts in a foreign currency.

Here

Macro first. Then the chart. From an Indian desk.

ONE REAL NIGHT

Friday 7 August, 6 PM India time.

Before the print, ADP came in at 44,000 against 65,000. September hike odds fell from two hikes to one. Gold was up 6% on the week.

I had three scenarios written down. A beat, a number near forecast, and a miss. The miss came, and it came big.

[Chart screenshot: NQ 1 minute, 6:04 PM entry]

Tap to enlarge

I entered at 6:04 PM in a bullish 1 minute fair value gap, stop below it. Four MNQ. One came off early. Three ran the full 102 points, about $500 to 600. I don't remember the exact stop size, so I won't make one up.

NFP · THE NUMBERS

-23K

Actual jobs added

Forecast	85K
Previous	20K
Unemployment	4.1%
NQ	▲ Up
Gold	▲ Up
Dollar	▼ Down

THE HONEST PART

This night was rare.

Most releases land near forecast. Price chops both ways and nothing runs.

Even this night, a lot was already priced in. The room left to run was smaller than usual. Knowing that is half the trade.

ROOM LEFT

Usual NFP move	~300 pts
Room left this night	~100 to 150 pts

WHAT YOU GET HERE

Built for the night before the print.

Briefings

Three scenarios before every big release.

Guides

Taught through one real event, then the terms.

Journal

Dated calls. Losing ones stay visible.

Prop firms

Firms by fit, payouts to India, honest pros and cons.

Next release briefing goes up before the print.

Not a signal service. Not advice. Stop loss on.

GUIDE · MACRO BASICS

What priced in really means

A bad number doesn't always move price. Here is why, using one real Friday night.

Aayush Namdev · Updated 8 Aug 2026 · 6 min read

On Friday 7 August, the jobs number came in at `-23K`. The forecast was `85K`. That is a big miss.

Most people expect a big miss to cause a big move. It did move. But less than you would think, because a lot was already priced in.

TRY IT · SCENARIOS

Pick the result. See what moves.

Beat · Near forecast · Miss

Nasdaq futures	Gold	September odds
▲ Up	▲ Up	Cut talk starts

Below 40K. This is what happened on 7 August. Cut odds rose and Nasdaq ran.

How much room was left

ADP had already come in weak, `44,000` against `65,000` expected. Gold was up `6%` on the week. So the market had half guessed the miss before it printed.

TRY IT · PRICED IN METER

Slide how much was already expected.

Usual NFP move	Room left to run
~300 pts	~120 pts

Most of it was guessed. This night was about here. Smaller run, cleaner target.

I entered at `6:04 PM` in a bullish 1 minute fair value gap. Four MNQ. Three ran the full `102` points. That fits the room that was left.

[Chart: NQ 1 minute, 6:04 PM entry]
